🔗 ADARSH-TKD

Summary

Computer Science undergraduate specializing in AI/ML and Web Development, with hands-on experience in developing ML models, full-stack applications, database systems, and AI-driven automation workflows. Experienced through internships at TATA and Blue Planet Infosolutions in building and optimizing real-world AI solutions. Skilled in Python, REST APIs, LLM-based applications, prompt engineering, and AI automation, with a strong problem-solving and debugging mindset.

Education

C.V. Raman Global University

B.Tech in Computer Science Engineering (AI & ML) | CGPA: 8.49

2023 – 2027

Bhubaneswar, Odisha

Kendriya Vidyalaya ARC Charbatia

Class XII | Percentage: 65.6

2023

Cuttack, Odisha

Kendriya Vidyalaya ARC Charbatia

Class X | Percentage: 83.5

2021

Cuttack, Odisha

Technical Skills

- **Languages:** Java, Python, C, C++
- **Web Frameworks:** HTML, CSS, JavaScript, React.js, Django, REST API
- **Databases:** MySQL, Relational Databases, SQL
- **AI/ML:** TensorFlow, Keras, Scikit-learn, OpenCV, NLP, Computer Vision, CNN, RNN, LLM, RAG, Prompt Engineering
- **Computer Science:** Data Structures, Algorithms, OOP, Object-Oriented Design, Algorithms, Complexity Analysis, DBMS, Operating Systems, Computer Networks
- **Systems Development:** Distributed Systems, Scalable Systems, Multi-tier Applications, Agile Development, Software Development
- **Tools Platforms:** Git, GitHub, Docker, n8n, VS Code, Jupyter Notebook, Google Colab, AWS

Experience

Tata Prashikshan - 2025

TATA Summer Internship

Jun 2025 – Jul 2025

Bhubaneswar, Odisha

- Achieved 95% detection accuracy at 30 FPS on live video feeds by implementing a real-time CNN-based PPE detection system with OpenCV, which led to faster identification of safety-gear violations across the monitored work zone.
- Reduced manual compliance-check effort by automating industrial server monitoring workflows and applying SAP S/4HANA fundamentals, which led to more consistent and streamlined monitoring across the work environment.

AI/ML Summer Internship

Blue Planet Infosolutions Pvt. Ltd.

Jun 2025 – Dec 2025

Remote

- Improved model readiness for production by supporting development of 3 ML models, which led to a 20% reduction in iteration time during experimentation cycles.
- Cut data processing latency by 25% by optimizing preprocessing pipelines and refining deployment strategies, which led to faster turnaround on 4 automation workflows.

Projects

Green AI – Afforestation Monitoring | Python, CNN, OpenCV | GitHub

- Developed a CNN-based afforestation monitoring system using Python in collaboration with IIT Kharagpur.
- Processed 62 GB of multi-period satellite and forest datasets provided by the Odisha Forest Department.
- Identified vegetation density and tracked plantation growth patterns for environmental impact analysis with 92% accuracy.

AI-Powered Customer Conversation Analysis | Python, NLTK, spaCy, Sentence Transformers | GitHub | Live Demo

- Developed an NLP pipeline to analyze WhatsApp messages and call transcripts, using Whisper for speech-to-text and NLTK and spaCy for text preprocessing.
- Applied BERT and Sentence Transformers for sentiment and intent analysis, with FAISS to identify similar conversations and recurring customer issues.

Achievements & Certifications

- **Solved 200+ DSA Questions:** Practiced Data Structures and Algorithms on **LeetCode**, **GeeksforGeeks**, and **HackerRank**.

- **Skill Competition Representative:** Represented the university in Cloud Computing, demonstrating real-time deployment using AWS services.
- **Certifications:** Certified in Neural Networks & Machine Learning (Coursera), Self-Driving Cars (Coursera), Innovation by Design (NPTEL), Python for Machine Learning & Data Science, and Django & Python Web Development (Silicon University, July 2024).
